

STANDARD FIRST AID KITS

Life International Training is approved by the Therapeutic Goods Administration to manufacture First Aid Kits (ARTG Entry No: 191130). Our experienced staff can assist you to manufacture First Aid Kits based on the likely risks associated with your business. These lists are provided on the basis that a risk assessment has not been undertaken.

The Queensland First Aid Code of Practice 2021 does not supply a definitive list of products. The relevant State and Territory First Aid Codes of Practice provides a list of minimum items that should be in your first aid kit. Industry refers to this as the National First Aid Kit.

MOBILE WORK FORCE

The Work Health & Safety Act 2011 (Qld) section 8(2) states “*Meaning of Workplace includes (a) a **Vehicle**, vessel, aircraft or other mobile structure*”.

Per the relevant ‘First Aid in the Workplace Codes of Practice 2021’ states that “*All workers must be able to **access a first aid kit***”.

Therefore, any fleet vehicles, sales representatives, company cars, or personal cars used for work require a minimum of a National Workplace First Aid Kit.

MONITORING

All kits come with a laminated contents/instruction card with a Unique Kit ID Number. This allows kits to be registered with Life International Training and be included in our monitoring program. The monitoring program periodically emails you that your First Aid Kit is due for checking.

Completed order forms are sent back to Life International Training and if multiple kits are associated with a site, all kits will be individually packaged and labelled. One Tax Invoice is issued for your order, you simply replace the individual kit packs for each kit.

ONSITE KIT CHECKING

Life International Training also offers onsite kit servicing. This incurs a minimum call out fee and a kit checking fee per kit.

WORKPLACE FIRST AID KITS

To ensure compliance with the Queensland First Aid Code of Practice 2021, employees must have timely access to a First Aid Kit and further states that ‘*this may include motor vehicles*’.

An employee that uses, even in part, a vehicle for the performing of their job, should have a First Aid Kit in the vehicle.
